Dad would laugh, but he would always bet on those horses for me, and when they won, I'd get the money (luckily he never charged me for the losses, which could have become expensive). I learned a little more about the game every week and I was hooked. I loved the numbers, trying to figure out an angle in every race, and by the time I was in my late teens I had discovered card games too. Gambling was fun for me, and I have always been able to keep it that way... Many people assume random number generators are corrupt. Better put, they think a machine can be manipulated once you're on the machine, adjusting the odds up and down to determine the outcome of the game. In this paranoid notion, it's like the casino management says, "I don't like

the looks of this guy. I'm going to make sure he loses." This is a misunderstanding of how the RNG works, or how casino regulations work. Even if the round brings no wins, keep your chin up. Main rules of the game are as follows: only the highest prize on the selected paylines is paid; combinations are made of more than three symbols and start from the leftmost reel to the right. As it is obvious from the name, 5 reel slots have 5 vertical rows of game symbols that spin and create winning combinations. The number of these combinations is the first thing that make 5 reel slots stand out as the increased number of reels make it possible to have more possible paylines and thus make these slots more lucrative. The increased number of reels also means that there can be more game symbols and more advanced features can be used. While in classic slots we only had wild and scatter symbols (and sometimes we didn't have any special symbols at all), free slot games with 5 reels made it possible to create different variations of wild symbols such as stacked or shifting wilds and also use more bonus rounds and mini-games. Another hallmark of 5 reel games is how they look. Modern technologies give more space for graphic and sound effects and that's why most of the 5 reel games are video slots or 3D slots. While the classic 3 reel games are usually so-called "fruit slots" where the only game symbols are fruits and lucky 7's, the 5 reel slots have more variety in themes. While playing free 5 reel slots online, you can travel to the Ancient Egypt or Asia, meet wild animals or walk around the creepy haunted house with just a few clicks. Animated symbols and various bonus games make video slots look more like full-fledged video games. They are cool to play when you are an experienced gambler but might be a little bit complicated if it's your first time playing casino games. So if you are a newbie, you'd better start with simple 5 reel games with no more than 20 paylines and then slowly move to more sophisticated games with advanced features and bonuses.
